# Clever Login Assistance

1. Be sure to sign in to the student's Google account first. If using a Chromebook, jump to the next step. If on a PC, please note you cannot use a personal account. If using Chrome on a PC, be sure you are using the student profile and not a personal one.
2. Next visit: https://clever.com/in/southamboy

Then follow the steps below to login using Google.

Logging into Clever with Google

Clever Academy

Not your district?
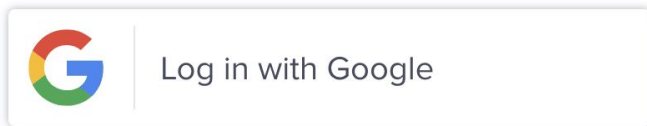

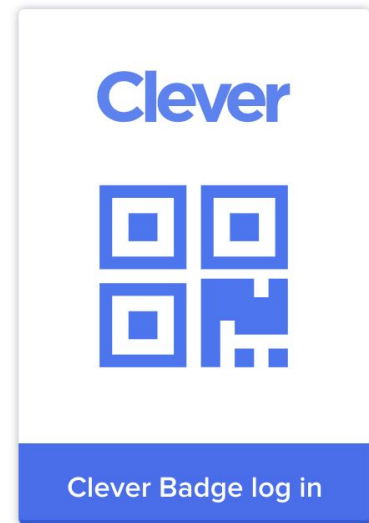

Click the '**Log in with Google**' button. Please note: using your personal Google email will not sign you into Clever.

If you see the following error message (*'**Uh oh! We were not able to authenticate using Google email: xxxx@sapublicschools.com**'*), this means that the Google email you signed into is not the email that is linked to your Clever account. Please make sure you are using your school Google email account.

If you are still having trouble when using your school Google account, **please ask your teacher or principal to let you know the correct school email that you should use to log into Clever**.
